CONTENTS OF VOLUME 345

December 1983

KNOX P. & PFLUG J.J. The effect of the canine popliteal node on the composition of lymph. 1

CLELAND B.G. Sensitivity to stationary flashing spots of the brisk classes of ganglion cells in the cat retina. 15

CLELAND B.G., HARDING T.H. & TULUNAY-KEESEY Ulker Response to the length of moving visual stimuli of the brisk classes of ganglion cells in the cat retina. 27

CLELAND B.G. & HARDING T.H. Response to the velocity of moving visual stimuli of the brisk classes of ganglion cells in the cat retina. 47

COLLMAN P.I., GRUNDY D. & SCRATCHERD T. Vagal influences on the jejunal 'minute rhythm' in the anaesthetized ferret. 65

DRAKE-HOLLAND Angela J., NOBLE Mark I.M., PIETERSE Mathias, SCHOUTEN Vincent J.A., SEED W. Anthony, ter KEURS Henk E.D.J. & WOHLFART Bjorn Cardiac action potential duration and contractility in the intact dog heart. 75

DÜRSTELER Max R. & von der HEYDT Rüdiger Plasticity in the binocular correspondence of striate cortical receptive fields in kittens. 87

HOMSHER E., IRVING M. & LEBACQ J. The variation in shortening heat with sarcomere length in frog muscle. 107

CLAUSEN Torben, KJELDSEN Keld & NØRGAARD Aage Effects of denervation on sodium, potassium and [^{3}H]ouabain binding in muscles of normal and potassium-depleted rats. 123

MORGAN Kathleen G. Comparison of membrane electrical activity of cat gastric submucosal arterioles and venules. 135

HILTON S.M., MARSHALL Janice M. & TIMMS R.J. Ventral medullary relay neurones in the pathway from the defence areas of the cat and their effect on blood pressure. 149

CHASIOTIS Dimitrios & HULTMAN Eric The effect of circulatory occlusion on the glycogen phosphorylase–synthetase system in human skeletal muscle. 167

ABERCROMBIE Ronald F., PUTNAM Robert W. & ROOS Albert The intracellular pH of frog skeletal muscle: its regulation in isotonic solutions. 175

ABERCROMBIE Ronald F. & ROOS Albert The intracellular pH of frog skeletal muscle: its regulation in hypertonic solutions. 189

HOLTON T. & WEISS T.F. Receptor potentials of lizard cochlear hair cells with free-standing stereocilia in response to tones. 205

HOLTON T. & WEISS T.F. Frequency selectivity of hair cells and nerve fibres in the alligator lizard cochlea. 241

LNENICKA Gregory A. & MELLON Jr DeForest Changes in electrical properties and quantal current during growth of identified muscle fibres in the crayfish. 261

LNENICKA Gregory A. & MELLON Jr DeForest Transmitter release during normal and altered growth of identified muscle fibres in the crayfish. 285

HATTON G.I., HO Y.W. & MASON W.T. Synaptic activation of phasic bursting in rat supraoptic nucleus neurones recorded in hypothalamic slices. 297

JACKSON Patrick C. Reduced activity during development delays the normal rearrangement of synapses in the rabbit ciliary ganglion. 319

TACHIBANA Masao Ionic currents of solitary horizontal cells isolated from goldfish retina. 329

LANSMAN Jeffry B. Voltage-clamp study of the conductance activated at fertilization in the starfish egg. 353

HARRISON P.J. & JOHANNISSON T. Segmental actions of afferents of the interosseous nerve in the cat. 373

ALLEN D.G., EISNER D.A., LAB M.J. & ORCHARD C.H. The effects of low sodium solutions on intracellular calcium concentration and tension in ferret ventricular muscle. 391

ITOH Takeo, KITAMURA Kenji & KURIYAMA Hirosi Roles of extrajunctional receptors in the response of guinea-pig mesenteric and rat tail arteries to adrenergic nerves. 409

GOTTLIEB Sue & TAYLOR A. Interpretation of fusimotor activity in cat masseter nerve during reflex jaw movements. 423

JOHNSEN James A. & LEVINE Michael W. Correlation of activity in neighbouring goldfish ganglion cells: relationship between latency and lag. 439

MINORS D.S. & WATERHOUSE J.M. Does 'anchor sleep' entrain circadian rhythms? Evidence from constant routine studies. 451

CALAM J., DIMALINE R., PEART W.S., SINGH J. & UNWIN R.J. Effects of vasoactive intestinal polypeptide on renal function in man. 469

EGAN T.M., HENDERSON G., NORTH R.A. & WILLIAMS J.T. Noradrenaline-mediated synaptic inhibition in rat locus coeruleus neurones. 477

LEE Jui S. Relationship between intestinal motility, tone, water absorption and lymph flow in the rat. 489

KENDAL W.S., KOLES Z.J. & SMITH R.S. Oscillatory motion of intra-axonal organelles of *Xenopus laevis* following inhibition of their rapid transport. 501

BATESON D.S. & PARRY D.J. Motor units in a fast-twitch muscle of normal and dystrophic mice. 515

HULTMAN Eric & SJÖHOLM Hans Energy metabolism and contraction force of human skeletal muscle *in situ* during electrical stimulation. 525

ECKERT Roger & EWALD Douglas Calcium tail currents in voltage-clamped intact nerve cell bodies of *Aplysia californica*. 533

ECKERT Roger & EWALD Douglas Inactivation of calcium conductance characterized by tail current measurements in neurones of *Aplysia californica*. 549

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

21–23 *July* 1983

Oxford Meeting

DEMONSTRATIONS

Barnes R.J., Comline R.S., Dobson A. & Drost C.J. An implantable transit time ultrasonic blood flow meter. 2*P*

Houchin Jane Estimation of masked neuronal inhibition. 3*P*

Barnett T.G. & Millar J. A one-chip noise clipper. 4*P*

Forsling Mary L. & Peysner K. A method for studying hormone release during hypovolaemia in the rat. 5*P*

Lee E.W., Lee K.S., Noble D. & Spindler A.J. A very slow inward current in single ventricular cells. 6*P*

Noble D. & Powell T. The effects of series resistance on second inward current recorded under voltage clamp in ventricular muscle. 7*P*

Booth C.M. & Brown M.C. A demonstration that rostro-caudal location in the spinal cord dictates a motoneurone's antero-posterior distribution within the rodent gluteus muscle. 8*P*

Harvey D. Software interface between a Nicolet 1170 and Research Machines Ltd. 380Z computer. 9*P*

Ashley C.C., Castell L.M. & Harvey D. Use of the fluorescent Ca^{2+}-indicator 'quin 2' in single barnacle muscle fibres. 9*P*

Moyses C. Modification to the Hansen osmometer. 10*P*

Annetts C.S.J. & Nye P.C.G. Averager for slow cycles of low-frequency pulses. 11*P*

Nye P.C.G. Programmes for analysis of noisy pneumotachogram signals. 12*P*

Fowler S. & Stein J.F. A test for the association of retinal with ocular motor signals which reveals a subject's leading eye. 13*P*

Robinson P.P. The innervation of oral tissues following unilateral trigeminal rhizotomy in the cat. 14*P*

Bland R.D. & Boyd C.A.R. Ion transport in lung epithelial cells isolated from fetal and adult rabbits. 15*P*

Massabuau J.-C. The respiratory system of the crayfish (a gas and ion exchanger). Film 16 mm, color, narrated. 15*P*

COMMUNICATIONS

Bioulac B., Commenges D. & Seal J. A sensorimotor function for neurones in area V of the monkey. 16*P*

Angel A., Banks D. & Gratton D.A. The use of automated serial micro-electrode penetrations to determine the neuronal organization of the rat sensory cortex. 17*P*

Guilbaud G., Lamour Y. & Willer J.C. Somatic peripheral receptive fields of SmI cortical neurones in normal and in arthritic rats. 18*P*

Noble R. & Rowe M.J. Summation properties and receptive fields of spinocervical tract (SCT) cells in the cat. 19*P*

Linden R.W.A. The relationship between adaptation rate and location of periodontal mechano-receptors in the cat canine tooth. 20*P*

Cahusac P.M.B. & Hill R.G. Response characteristics of rat caudal trigeminal neurones to thermal stimuli. 21*P*
